

Covor profesional industrial din cauciuc tip Solid

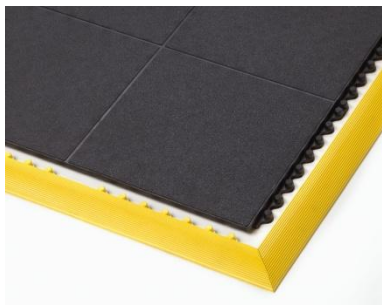

Covorul tehnic din cauciuc tip SOLID in module de 91*91 cm (perforat sau plin) este rezistent la uleiuri, rezistent la foc fiind recomandat atat in industria alimentara cat si in atelierele mecanice si de sudura.

Varianta cu gauri pentru scurgerea lichidelor si uscare usoara. Modulele 91*91 cm pot fi conectate cu usurinta atat longitudinal cat si transversal pentru a acoperi orice zona in functie de configuratia si nevoile locului de munca, putand fi echipate cu margini de siguranta.

Variante Solid perforat : **negru** - standard ; **rosu** 75% nitril rezistent la lubrifianti, grasimi vegetale si animale recomandat in industria alimentara; **negru FR** 100% nitril, rezistent la uleiuri, ignifug rezistent la foc clasa Bfl-S1 recomandat in atelierele mecanice si de sudura.

Variante Solid plin: **negru** - standard ; **negru FR** 100% nitril, rezistent la uleiuri, ignifug rezistent la foc clasa Bfl-S1, rezistent la alunecare R9 recomandat in atelierele mecanice si de sudura ; **negru ESD DIF FR** 100% nitril antistatic si ignifug rezistent la foc clasa Bfl-S1

BENEFICIIL:

Ignifug rezistent la foc Bfl-S1 (DIN EN ISO 13501) si clasa I (ASTM E648-03 (NFPA253))

Antistatic indeplineste IEC61340-4-1, rezistivitate $R_g 10^6-10^9 \Omega$, $R_p 10^6-10^9 \Omega$
